WELCOME

A bold statement perhaps, but that is our goal. We take great pride in our customer relationships and providing cost effective drilling solutions for our clients. Friendly knowledgeable customer service and project management, timely accurate estimates and daily job costs, powerful reliable equipment, experienced drilling crews and an excellent safety record is what creates value for our clients. At JED we bring a firm commitment to achieving excellence at every level of the project cycle.

Our wide range of specialized drilling equipment and years of industry experience can provide you with the best possible site data for your next drilling project. There are always technical and environmental challenges to any drilling project. We are experienced, resourceful and solution driven to safely overcome the most demanding project requirements on time and on budget.

“We are committed to the health and safety of our company’s most valuable assets...Our People”.

OUR STORY

Just a couple of farmers! With our backgrounds in 'dirt' we were driven by the opportunity to unite the oil and gas industry in Alberta with our inherent love of the land. Our story begins in 2004 when we joined forces and purchased a small rig anchoring company out of Lloydminster, Saskatchewan. We quickly put the two 1-ton rigs to work augering soil samples for local clients.

Today, through hard work and the contributions of many we are privileged to have grown into a full service Environmental, Geotechnical, Coring and Construction Drilling contractor servicing western Canada. There have been a few changes along the way, but hard work and integrity have always been at our core.

What does JED stand for?

We get asked this all the time!

A great question with a simple answer...J*E*D* are the initials of the 3 original founders of JED Anchors!

Although we call Alberta home, we are proud to service all areas of the western provinces. With a fully equipped head office in Penhold, AB, and a field office in Lloydminster, AB, we are uniquely located to provide convenient, reliable, and cost-effective environmental solutions to all corners of Western Canada.

SUSTAINABILITY

With our roots in agriculture, we have a deep understanding to coexist with the land and the environment in which we live. We make every effort to reduce our environmental footprint and avoid jeopardizing the ability for future generations to meet their needs. We strive to accomplish this by operating equipment with a reduced environmental and carbon footprint while concentrating on waste minimization.
