

Vincent Lam Co-founder & CEO

How modern digital platforms can help you achieve 100% budget control

There is no easy way to keep track of environmental impact, geospatial data, project costs and other key information for operators, project managers and field teams.

## **Budget overrun: Data is the problem**

Budget - Costs = Remaining

- Costs are tracked in different places
- Delays in cost reporting

### What if you can...

- See all project budgets in one place?
- Match field and actual cost to 100%?
- Be notified when budgets reach threshold?
- Without the extra effort or data entry?

## **About Matidor.com**

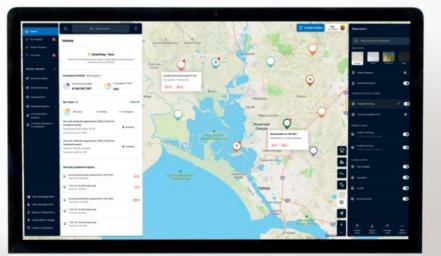

#### **Intuitive Project Management on a Live Map**

- Intuitive
- Geospatial
- Easy sharing
