

2025 ESAA Board Election

Candidate Biographies

Erica Andrew

Senior Environmental Scientist
Thurber

Erica is an experienced environmental professional with over 23 years in the industry. She began her career in the lab industry, where she gained hands-on experience in environmental sampling, analysis and testing, before transitioning to consulting, where she leveraged her technical expertise to manage and lead a variety of environmental projects.

Throughout her career, she has managed and contributed to a wide range of projects, including linear developments such as roadways and pipelines, as well as commercial properties, downstream oil and gas, midstream operations, and renewable energy resources like solar farms.

With a strong background in environmental management, Erica has served as the environmental lead on numerous multidisciplinary projects, ensuring compliance with regulatory standards and minimizing environmental impact. Her expertise spans across Phase I and Phase II Environmental Site Assessments (ESAs), remedial excavations, and groundwater monitoring and sampling programs.

Erica is a Senior Environmental Scientist at Thurber, where she plays a key role in growing and developing the environmental team in Calgary.

Vivian Bond

Manager – Business Development, Prairies & NWT
Bureau Veritas

Vivian is a seasoned environmental professional with over 15 years of experience in the environmental lab sector. Throughout her career, she has cultivated a comprehensive understanding of environmental testing, compliance, and sustainable practices. Her dedication to purpose-driven business and environmental stewardship, combined with a focus on innovative solutions, has empowered her to leverage technology to enhance efficiencies and create a positive impact.

A strong advocate for sustainability and community engagement, Vivian has actively participated in outreach programs that educate the public on sustainable practices and the importance of environmental stewardship. She believes that effective collaboration among stakeholders is crucial for fostering a culture of sustainability.

In addition to her professional expertise, Vivian is committed to continuous learning and staying updated on industry trends. As a prospective board member of the Environmental Services Association of Alberta, she seeks to utilize her knowledge and passion to support the association's mission and drive meaningful initiatives within the community.

Adam Dunn
Vice President
Earthmaster Environmental Strategies

Adam Dunn is the President of Earthmaster Environmental Strategies in Calgary, Alberta. He is a graduate of The University of New Brunswick in Fredericton and Memorial University in St. John's Newfoundland. Adam has a Master's in environmental science and has over 24 years of environmental consulting and management experience in the upstream and downstream oil and gas and commercial industries in Canada.

Adam has significant experience in spill response, hydrogeological assessment, hazardous materials surveys, regulatory compliance and liability management and evaluation.

Adam has been an ESAA Board Member since 2022 and currently serves on the ESAA Board Executive as the secretary. Adam is a longtime supporter of ESAA and participant in the many ESAA events over his 20 years in Alberta.

Katie Oliver
Director, Corporate Development
KBL

Katie Oliver is the Director of Corporate Development at KBL Environmental, with over 20 years of experience in the environmental sector. A certified Environmental Manager and Project Management Professional (PMP), Katie has led numerous environmental consulting, waste management, and remediation projects. Her expertise spans regulatory affairs, government relations, and ESG initiatives.

Notably, she served as Chair of the City of Leduc's Environmental Advisory Board, where her efforts earned national recognition for sustainability. Katie is passionate about fostering partnerships with Indigenous communities and stakeholders to promote environmental innovation and sustainable practices in the industry.

Scott Purves

Team Lead for the Liability Management and Decommissioning Restoration
Worley Consulting

Scott Purves is a designated environmental professional and professional agrologist with 25 years of experience in the environmental services industry. Scott obtained a Bachelor of Science degree in land use and environmental studies from the University of Saskatchewan in 2000. Scott is currently the Technical Director of Assessment, Remediation and Reclamation at Montrose Environmental across their Canadian operations. Prior to that, Scott spent 9 years in an operational leadership role as Vice President, Operations.

Scott's project experience has been mainly focused on large scale multidisciplinary spill response projects, assessment and remediation of contaminated sites, and management of reclamation portfolios with a focus on reducing the total time and cost to closure. His project experience has also included risk assessment and risk management, liability estimation, soil and groundwater monitoring programs, in situ and ex situ remediation, waste management and construction projects. Scott also spent several years away from consulting, working for environmental services companies focused mainly on various ex-situ treatment options for contaminated sites. This led to becoming an eventual part owner and operator of a similar business. These varied experiences have given Scott a broad perspective of the strength of and challenges facing the environmental services sector in Alberta.

Most recently Scott has had the pleasure of serving on the ESAA board of directors from 2022 to present. This has included the role of President since the 2024 AGM. He has also had the opportunity to contribute to the Alberta Recycling Management Authority (ARMA) as a member of their Board of Directors Nominating Committee since 2023 due to the ESAA being a member company of ARMA. Prior to his involvement on the board, he had the opportunity to work with the ESAA leadership team and other industry leaders as part of the ESAA SRP Working Group. Scott has also previously served on the board of directors for Matrix Solutions Inc. from 2017 to 2019 and was chair of the Kalyna Branch of the Alberta Institute of Agrologists from 2015 to 2018. Scott has also served as an advisory member on the Program Advisory Committee for the Bachelor of Applied Science – Environmental Management program at Lakeland College from 2016 to 2021.

Myke Stercl

Team Lead for the Liability Management and Decommissioning Restoration
Worley Consulting

Myke Stercl is the Team Lead for the Liability Management and Decommissioning Restoration service line at Worley Consulting and has over 19 years of experience in the environmental industry. He holds a Diploma in Environmental Engineering Technology from SIAST in Saskatchewan and a Bachelor of Applied Science in Environmental Management from Lakeland College. He is an engaged, proactive and innovative environmental consultant with countless hours in the field on various upstream and downstream oil and gas facilities.

Over the past four years at Worley Myke has not only taken on the role of Team Lead but also manages the equipment warehouses across Western Canada, using his experience in the field to provide technical and practical solutions and is relied upon for his strategic and forward-thinking approach to environmental assessment and management. He is known to be a tireless advocate for his team and colleagues, and excels at collaboration and team building. When Myke is not focusing on work at Worley he enjoys spending time with his family, camping, working on the never ending list of projects in the garage and being outside.
